Rigid Mount Washer

Available in Coin or Manual operation and fitted with our Easy Control microprocessor or alternatively a Fully Programmable version is available.

Frequency controlled motors allow total control on the wash and spin speed with smooth acceleration to high speed extraction. Cabinets are manufactured from high grade stainless steel, with the integral frame manufactured from carbon steel for a longer life span.

To help the environment all machines are equipped with accurate electronic water level and temperature sensors in order to control water and energy consumptions during the cycle.

The WN range washer is ideally suited for Launderettes, Drycleaners, Small Commercial Laundries, Caravan & Camping and Equine establishment. All machines are suitable for marine use.
